2018

PROJECTS

THE HUDDLE STORE

[[Live](#) | [Github](#)]

Apr 2022 – Jul 2022

- **TECH STACK**: *Javascript, ReactJs, NextJs, Sanity, Vercel*
- An Ecommerce Website for Headphones, Speakers and many more.
- **Sanity** is used for content management which allows us to focus on developing the application without having to worry about file storage, content, databases.
- **Stripe** is used for payments, shipping rates and product checkout process.
- Advanced state management of entire application using React Context API.

HUNGAMA

[[Live](#) | [Github](#)]

March 2022 – July 2022

- **TECH STACK**: *Typescript, ReactJs, NextJs, Zustand, Oauth, Sanity, Vercel*
- Hungama is an application where users can upload videos. It has features like personal profile wherein user can view their uploaded videos as well as view videos which they have liked, search by their favorite category, suggested accounts.
- NextJs practices such as **File based routing** and Data Fetching which allows Server-Side Rendering and Static Generation which makes Hungama incredibly optimized.
- State Management with the help of **zustand** which is an alternative to redux and context API.
- **Oauth** has been used for login/logout and registering new user using google. And **Sanity** is used to manage entire content of the app.

PCOS: *Seek the help you need*

[[Github](#)]

Feb 2022 – Present

- **TECH STACK**: *ReactJS, MongoDB, Mongoose, ExpressJS*
- Polycystic ovary syndrome (PCOS) is a serious hormonal imbalance that can wreak havoc in women's everyday life. User will be able to self-diagnose the condition as they go through the website. The feature of PCOS Tracker will enable them to seek clarity if they need medical assistance.
- For the **PCOS Companion feature**, the algorithm is a **scoring-based algorithm**. Each feature is given a particular score and the total addition of the score gives us a probability that can be used to determine the outcome. The features can have different scores based on its importance and this in turn will help us determine the outcome more precisely.
- A chat forum will be enabled where user will be able to interact with other users. Blogs feature where user can journal their journey and make it available to all.
